

# Walerga Bridge Replacement Project

## Project Begins Spring 2019

Placer County Department of Public Works is replacing the existing bridge on Walerga Road over Dry Creek. The project is located near Dry Creek Community Park, south of Baseline Road and north of PFE Road. The new bridge will be 14' taller than the existing bridge and will include:

4 lanes with 4' shoulders

A 12' wide Class 1 Bikeway

An 8' wide walkway

New trail connectivity

## What to Expect During Construction

During the 2 ½ years of construction on Walerga Road Bridge over Dry Creek, **you can expect Walerga Road Bridge and Dry Creek Park to remain open throughout construction.** If there any short-term park closures the public will be notified in advance. Bicycle and pedestrian pathways will also remain open during construction.

## Stay Updated!

Placer County is committed to providing timely notifications to area residents and the traveling public. All construction related activities, key information and updates will be posted on the project website

[www.walergabridge.com](http://www.walergabridge.com)

or you can contact the project hotline at

**916.231.5108**

and a project team member will get back to you.
